Objective

Seeking a challenging position in Software Development to leverage my expertise in Web Development and AI/Data Science. Aiming to contribute to innovative projects at the intersection of full-stack development and practical problem-solving in fields such as web applications and data-driven systems.

Education

- **Jhulelal Institute of Technology** June 2024 - June 2028
BE/B.Tech in computer science Nagpur, India
· CGPA: 8.03/10
- **Gurukunj Convent & Junior College** June 2024
Higher Secondary Certificate (HSC) Nagpur, India
· Percentage: 69.83%
- **Ashirwad High School** June 2022
Secondary School Certificate (SSC) Nagpur, India
· Percentage: 82.40%

Projects

- **Full-Stack E-Commerce Platform** January 2025
Tools and Technologies: React.js, Node.js, Express.js, MongoDB, Tailwind CSS 
· Developed a responsive e-commerce platform with user authentication and product management
· Implemented secure payment integration and order tracking functionality
· Created an admin dashboard for inventory and user management
· Deployed the application using AWS EC2 and implemented CI/CD pipeline
- **Personal Portfolio** December 2024
Tools and Technologies: React.js, TailwindCSS, Nodemailer 
· Created a minimalist and clean design with modern layout and smooth animations
· Implemented fully responsive design using Tailwind's breakpoints
· Added dark/light mode support using Tailwind's dark mode utilities
· [Live Portfolio](#)
- **Modern Chat Application** November 2025
Tools: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Cloudinary, Material UI 
· Real-Time Messaging: The app enables real-time communication between users, utilizing WebSocket or socket.io for instant message delivery.
· Modern UI/UX: Built with Material-UI (MUI) for a sleek, responsive, and customizable user interface, offering a smooth chat experience across devices.

- Backend and Database Integration: The backend is powered by Node.js and Express, handling user authentication, message storage, and retrieval, while MongoDB is used for scalable and efficient data storage.
- Deployed the backend application using AWS EC2 and implemented CI/CD pipeline
- frontend deployed on Vercel
- [live preview](#)
- AI-Powered Chatbot: Built a chatbot using the Gemini API for intelligent and context-aware responses.
- Typewriter Effect: Implemented a typewriter effect for dynamic message rendering, enhancing user engagement.
- Modern UI/UX: Designed for a responsive and visually appealing interface with dark and light mode toggle.
- Frontend Deployment: Deployed on Vercel for fast and reliable performance.
- [Live Preview](#)
- Recipe Finder App: Developed a recipe search app using the Spoonacular API to fetch and display recipes based on user input.
- Modern UI/UX: Designed with Tailwind CSS for a clean and responsive user interface.
- Search and Filter: Implemented search functionality with filtering options for better user experience.
- Favorites Management: Enabled saving and managing favorite recipes using local storage.
- Frontend Deployment: Deployed on Vercel for fast and reliable performance.
- [Live Preview](#)

Skills

- **Programming Languages:** JavaScript, Python, Java, HTML5, CSS3
- **Web Technologies:** React.js, Node.js, Express.js, Tailwind CSS, Bootstrap,
- **Database Systems:** MongoDB, MySQL, SQL
- **Machine Learning:** NumPy, Pandas, Scikit-learn, TensorFlow, Jupyter Notebook
- **Version Control:** Git, GitHub
- **Development Tools:** VS Code, Postman

Additional Information

Languages: English (Professional), Hindi, Marathi (Native)

Interests: Web Development, Machine Learning, Cloud Computing, Artificial Intelligence.
